- Communication
- Presentation Skills

Education

University of Information Technology (UIT)
Bachelor of Information Technology

09/2025 - Present

FPT Polytechnic College
Software Development

09/2025 - Present

GPA: 3.65/4.0

OBJECTIVE

QA/QC Tester with over one year of experience in Web, Mobile, and API testing. Experienced in requirement analysis, test planning, test case design, defect tracking, and Agile software development processes. Strong analytical mindset with attention to detail and a passion for delivering high-quality products. Seeking to contribute to software quality while continuously developing expertise in automation testing and advanced QA practices.

EXPERIENCE

Laztar Software Company

Jun 2025 - Jun 2026

QA/QC Tester

Online Sports Venue Booking Platform

QA Engineer responsible for testing a mobile translation application with over 10 million downloads worldwide.

Key Responsibilities & Achievements:

- Performed requirement analysis, test planning, test case design, and manual testing activities.
- Conducted functional, regression, and compatibility testing across multiple Android devices and OS versions.
- Validated core features including screen translation, OCR text recognition, camera translation, voice translation, subscription management, and language switching.
- Executed testing across various screen resolutions and device configurations to ensure application stability.
- Worked closely with developers and product managers to verify bug fixes and release quality.
- Supported release testing and feature enhancement validation for new product updates.

EZ Screen Translator

QA Engineer responsible for testing a mobile translation application with over 10 million downloads worldwide.

Key Responsibilities & Achievements:

- Performed requirement analysis, test planning, test case design, and manual testing activities.
- Conducted functional, regression, and compatibility testing across multiple Android devices and OS versions.
- Validated core features including screen translation, OCR text recognition, camera translation, voice translation, subscription management, and language switching.
- Executed testing across various screen resolutions and device configurations to ensure application stability.
- Worked closely with developers and product managers to verify bug fixes and release quality.
- Supported release testing and feature enhancement validation for new product updates.

AI-Powered Personal Planning Platform

QA Engineer responsible for testing an AI-powered productivity platform that generates personalized goals, milestones, and task plans based on user prompts.

Key Responsibilities & Achievements:

- Performed requirement analysis and designed comprehensive test scenarios for AI-generated planning workflows.
- Executed manual testing, API testing, regression testing, and business rule validation.
- Verified AI-generated goals, milestones, task scheduling, reminders, progress tracking, streak management, weekly reviews, and notification systems.
- Validated business logic for plan optimization and personalized recommendation features.
- Collaborated closely with developers and product stakeholders to ensure feature accuracy and user experience quality.
- Identified edge cases and inconsistencies in AI-generated results to improve system reliability.

Event Management Platform

QA Engineer for a large-scale event management platform featuring attendee registration, QR check-in/check-out, voting, scheduling, notifications, and analytics.

- Created and executed test cases for Web, API, and business workflows.
- Performed functional, regression, integration, and API testing.
- Validated registration, QR check-in, voting, notification, and reporting features.
- Reported and tracked defects using Jira and verified bug fixes.
- Collaborated with cross-functional teams in Agile Scrum development.
